MAKING GATE HARDWARE

2

Founded in 1995, Gatemaster is the UK manufacturer of innovative ranges of gate locks, closers and hardware for metal and wooden gates.

> Simple innovation Custom-designed for ease-of-use

Practical performance Built to always get the job done

We're all about making things simple, robust and fit for purpose - nothing fancy, just good solid products!

We believe this is what you as gate manufacturers are looking for, something that is easy and quick to fit, does its job well and lasts a long time.

We want gate professionals all around the world to see Gatemaster products as your first alternative because of the reliability, durability and convenience in installation.

Get in contact with our specialist sales team for any queries. Call +44 (0)1243 558580 Email sales@gatemasterlocks.com

GATEMASTER

Superlock bolt-on latch deadlock

The bolt-on latch deadlock has both the convenience of a latch and the security of a deadlock, while its slim 70mm width means the lock will fit into most gate designs.

- Secure single stainless steel latchbolt which latches 15mm into the gate post and then moves to 30mm when deadlocked.
- Marine grade made from stainless steel and brass, the lock is guaranteed to stand up to all weathers.
- Adaptable slim 70mm case means this lock can suit a variety of different gate styles.
- Convenient latchbolt is adjustable in length and can be rotated for left or right handed gates.
- Reliable supplied with a guide plate with brass bearing to ensure the lock lasts!
- Available in two sizes 1030 for 10 to 30mm flat bar or box section gate frames and 4060 for 40 to 60mm gate frames.
- Supplied with handles two styles available: a profiled lever style handle (P) or a traditional handle (T).
- Use with the Superlock keep to increase security and product life (see p. 20).

G GATEMASTER

Superlock keep

This keep works with all of the Superlock range. Simply mount the gate slam plate onto the gate frame when fixing the lock and use the expanding fasteners to fix the keep onto the gate post.

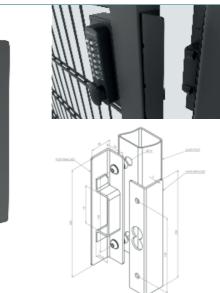

- Secure - prevents access to the latchbolt
- Versatile gate keep is simple and easy to fit • to a wide range of applications.
- Improves gate appearance slim design • improves gate appearance.

Superlock keep

BSK

BSKS

Superlock interlocking keep

The clever interlocking design of this keep means that the gate cannot be levered off the post once the gate is closed. One section bolts in front of the lock and the post bracket is easy to fit with 2 expanding fasteners.

- Secure prevents the gate being levered or spread apart
- Easy to fit simple and easy fitting on a • wide range of applications.
- Improves gate appearance - slim design improves gate appearance.

Superlock interlocking keep

Superlock gapless keep

The gapless keep is a great option when there is a small gap between the gate and the post, as it acts as both a security measure and a gate stop. Simply drill 2 holes in the post and bolt on with our innovative expanding fasteners.

- Versatile gate keep is simple and easy to fit to a wide range of applications.
- Secure prevents access to the latchbolt. •
- Improves gate appearance slim design • improves gate appearance.

BSKG Gapless keep

NEW IMPROVED DESIGN

This security shroud is designed to prevent access from the outside of the gate, meaning that intruders cannot reach round and operate the lock. No fixings are required, simply bolt the shroud on in front of the lock. The BQS Security shroud has received a design update, which now makes it compatible with the Superlock Quick exit gate locks (pp. 17 - 19) and now also the single-sided Superlock Digital gate lock (p. 16).

The round bar adapter enables any of the Superlock range to be easily fitted to a round gate section. It consists of a gate adapter and a gate post adapter to ensure secure fixing of the Superlock and any of the keeps within the range. The stainless steel construction ensures longevity and corrosion resistance.

Superlatch surface fixed digital latch

The Superlatch digital is a simple push button locking option that is a great alternative to fitting low cost keypads to your gate. With a marine grade keypad on the outside of the gate and a fully stainless steel latch on the inside, the innovative design enables easy and secure locking without a complicated installation process.

- Easy to fit simply drill 3 holes through the gate and screw on.
- Auto-latching close the gate and the latchbolt latches into the gate frame.
- Secure latch is protected by the integrated shroud.
- Durable marine grade keypad and fully stainless steel latch with powder coated finish ensures long product life.
- Reversible the latch can simply be flipped over for left or right handed gates.
- Versatile can be fitted to wooden or metal gates, indoors or out.
- Drilling guide included.
- As standard, the SLDS is supplied with fixings and spindle to suit gates of up to 75mm thick.
- We have an extension kit for gates that are 75mm-140mm thick.

G

GATE LOCKS

A simple and robust gate lock which fits to the surface of the gate. Easy to install by simply screwing onto the inside of a gate. Suitable for both metal and wooden gates. This lock requires you to turn the key behind you to deadlock the gate.

- Keyed both sides for easy access.
- Non-handed suits left hand and right hand gates or doors.
- Long throw 53mm movement with one turn of the key.
- Stainless steel suitable for all outdoor environments.
- Weld-in lock plates available these can be welded or screwed on the gate and have the correct holes and fixings for fixing the gate lock. The slotted lockplate is used with the keep plate and is ideal for securing double gates (see opposite page).
- Screw fixed keep plate (GLBKT) supplied with the lock.
- Lock is supplied with fixings screws to fit both lock and keep plate.

THE LOCK EUROCYLINDER WHICH EXTENDS FROM THE BACK OF THE LOCK IS AVAILABLE IN 2 LENGTHS FOR DIFFERENT GATE THICKNESSES.

Eurocylinder extends 24mm

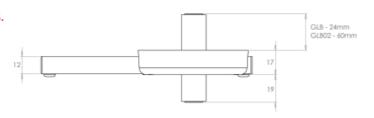

Eurocylinder extends 60mm

55

Electric release, mortice, heavy duty, monitored

This heavy duty electric release with an integral switch can be used to confirm that a gate is closed. The ERHDM can convert to fail safe (it unlocks when power fails) or fail secure (it remains locked when power fails) depending on what your application requires.

The electric release is a robust product with a stainless steel faceplate and a deep locking tongue to allow for more gate tolerance. It is mortised into the gate frame. We recommend you contact an electrician or electric gate specialist to install this.

ERHDM Electric release, mortice, heavy duty, monitored

The Bike Storage Lock Solution

Combine the Electric release with the new Superlock Keylatch for the perfect solution for bike storage units or other external storage units. This combination can be used in conjunction with an electronic access control system, enabling it to be opened with a fob reader or entry method of your choice, as well as the secondary option to use the key. For the exit, you can similarly fit an electronic push button, or you can fit a thumb-turn cylinder to the lock which is an easy and costeffective way to allow quick exit.

- Easy access with an electronic entry method of your choice Option for internal thumb-turn for one-hand exit
- Option for internal thumb-turn for one-hand exit
- Set the keep to fail safe or fail secure in the case of power cut
- Keep will help protect the latch and the gate frame

GATEMASTER

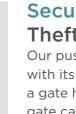

GATE HINGES

One of the most important parts of a gate, **the gate hinge** plays a crucial role in terms of usability and user safety. We focus on the highest quality materials and top engineering to ensure our hinges not only meet but exceed what is required of them.

G

62

63

Superhinge

More Power, Less Friction

Our Superhinge is one of the strongest and most durable gate hinges in the market, ensuring low-friction operation for many years.

Stop Hinge

The Stop Hinge Set is a durable pivot set that prevents the gate opening more than 100°. This reduces the risk of a crushing point between the gate and post.

Security Collars Theft Prevention

Our push-fit security collar prevents gate theft with its innovative design. Simply push onto a gate hook above the gate eye to ensure the gate can't be lifted off.

Gatemaster Superhinge

The Gatemaster Superhinge is one of the most durable gate hinges in the range, tested to 500,000 openings with little to no wear. It incorporates brass bearings within the hinge which ensure a smooth action and guarantee the gate opens and closes reliably with a lifetime guarantee.

- Strength tested - suitable for gates up to 900kg per pair.
- Long lasting tested to 500,000 openings • with no wear, that's 50 years at an average of 25 openings a day!
- Durable low friction, ideal for use with automated gates.
- Adjustable adjustable bolt for precise gate • fitting on site.

GATEMASTER GUARANTEE - we have proved these hinges have exceptional wear resistance and guarantee to replace any hinge which shows excessive wear up to 20 years after purchase.

GATE

MAKING

Secure locking drop bolt

This secure locking drop bolt is easy to fit to the gate with our expanding fasteners. Used on double gates, once the drop bolt is in the ground, the locking plate is rotated round the edge of the gate, meaning when the second gate is closed the drop bolt cannot be lifted.

- Robust strongly constructed and available in an aluminium or stainless steel finish.
- Easy to fit needs just two 15mm holes in the gate and fixed with the expanding fasteners provided.
- Adaptable to fit left and right hand gates.
- Innovative and secure once the drop bolt is lowered and rotated, closing the second gate prevents the drop bolt being unlocked.

AVAILABLE VERSIONS					
LDB	Locking drop bolt, aluminium				
LDBSS	Locking drop bolt, stainless steel				

Auto-locking drop bolt

A substantial drop bolt designed for securing double gates. The Auto-locking drop bolt is lowered and rotated so that the lifting plate folds across the edge of the first gate. The drop bolt is now locked in position, closing the second gate prevents the drop bolt being unlocked.

- Robust the 19mm drop bolt moves 100mm ensuring the gate is bolted securely into the ground.
- Adaptable available in either a weld fix or bolt on version.
- Ingenious design ensures that the drop bolt cannot be lifted when both gates are closed.
- Adaptable suitable for left or right hand gates.

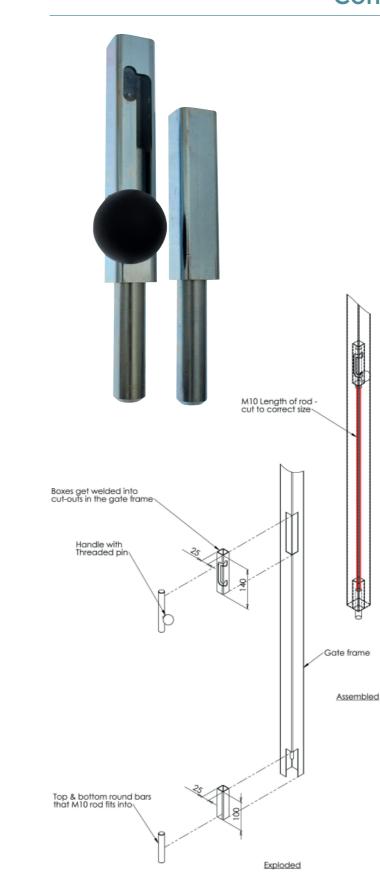

Available in a weld fix and a bolt on version. The bolt on version is supplied with fixing bolts.

Buffers Silent closing

Gate buffers are an important part of your gate to ensure that the gate closes without a bang. When gates are getting constantly used, especially in residential areas, adding buffers will reduce the noise created when the gate closes.

We also offer the buffers fixed to a bracket which can act as a gate stop, meaning that you don't have to fit a separate stop to prevent the gate swinging back in the other direction.

G

ACCESSORIES

GATE

MAKING

Gate bump stop

These bump stops will reduce the noise and vibrations of the gate banging shut, often used in residential areas where noise can disturb the public.

- Noise damper reduces the noise made when a gate closes.
- Easy to install simply screw into the gate stop with the nut provided.
- Commonly used on pedestrian gates.

GRS04

Gatemaster Gate Restrainer

The stainless steel gate restrainer is a safety feature that reduces the risk of gates falling in the event of hinge failure. This strong but simple device is a great backup for swing gates when there is potential for the gate hinges to fail and cause fatal harm to pedestrians or damage to property.

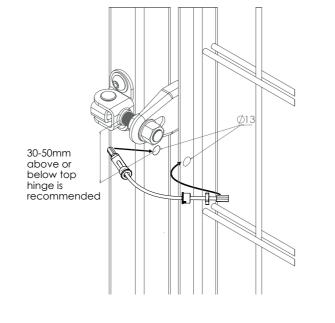

- · Heavy duty strongly constructed from flexible braided stainless steel wire and stainless steel end stops
- Easy to fit just needs 2x 13mm holes. •
- Adapable fits on any box section gate and can easily be retro-fitted.
- Stainless steel suitable for all outdoor • environments.
- Neat and unobtrusive makes a nice finish to any gate of any colour!
- Tested on gates up to 500kg.

Please note - this solution is based on the assumption that in the event of hinge failure, the edge of the gate will hit the ground before the restrainer comes into play. The device is designed to prevent the gate falling sideways rather than taking its full weight. If the dimension from the bottom of the gate to the ground is longer than the restraining device, the device may not be suitable for your gate.

GATE CLOSERS

Gate Closing Strut Simple, Reliable Closing

A simple and reliable gas strut closer that has been proven over many years.

Hydraulic Gate Closer Adjustable Consistency

A robust and easy to fit gate closer for welding on to the gate, perfect for use on playgrounds

Light Duty Gate Closer Cost-Effective Safety

A solution for temporary or light weight gates, ensuring the gate is always kept closed for the safety and security of labourers.

MAKING GATE HARDWARE SIMPLE

Gate closing strut

The reliable and long lasting GSB gate closer is ideal for closing gates up to 80kg. Simply weld or screw fix the brackets to the gate and post and fit the closer to the brackets. The unique hydraulic damping ensures that the gate will close slowly.

- Adaptable the closer comes with either weld on or screw fixed brackets for fitting to a range of different gate types.
- Reliable a proven closer that has been closing gates regularly for many years.
- Adjustable force no need to release gas, the closer can be moved along the brackets to increase or decrease the force. This means the strength of the close can be adjusted.
- Easy to fit adjustable brackets also mean • there is no need to compress the strut when fitting to a gate.
- From experience these closers can close much heavier gates if the hinges are free running. Contact us if you are unsure on your particular gate.
- If permanent force reduction is required, a gas release tool is available - contact the Gatemaster team for more information.

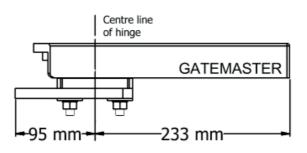

Weld-fix or screw-fix brackets are available, giving the option for fitting to metal or wooden gates.
